### **Part III DETAILED ACTION**

#### *Notice to Applicant(s)*

1. This action is responsive to the following communications: amendment filed on **6/24/04**.
2. This application has been reconsidered. Claims 3-7, 10-14, 17 and 18 are pending.

#### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 3, 4, 5, 6, 7, 10, 11, 12, 13, 14, 17, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Toyama et al (Toyama) (U.S. 6,198,841).

With respect to claims 3, 4, 10, 11, and 17, Toyama discloses light irradiating means for scanning a surface of a document on a document table while irradiating the surface with light (column 4, lines 6-23); color photoelectric conversion means for reading light reflected from the surface of the document, as reflected light, and photoelectric converting the reflected light into

Art Unit: 2626

plural color signals (column 4, lines 6-23); white reference means provided at the side of the document table for being read and photoelectric converted by the color photoelectric conversion means (column 4, lines 6-23); storage means for storing signal data comprising plural color signals that are photoelectric converted by the color photoelectric conversion means and white document data comprising plural color signals that are read and photoelectric converted by the color photoelectric conversion means from a white document in color equivalent to the white reference means placed on the document table (column 4, lines 47-66); and correction means for executing a color balance correction and a stray light correction simultaneously with the execution of a shading correction based on the signal data and the white document data stored in the storage means (column 4, lines 6-10, column 4, line 47 to column 5, line 21, and column 6, lines 13-18).

With regard to claims 5, 6, 12, and 13, Toyama discloses the correction means further executes the correction of uneven density in the moving and scanning direction of the light irradiating means simultaneously with the other corrections (column 1, lines 58-67).

With respect to claims 7, 14, and 18, Toyama discloses the sub-scanning data comprises a mean value of plural pixels at plural positions in the moving and scanning direction (column 7, lines 34-56).

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 3-7, 10-14, 17, and 18 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2626

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
